PROFILE

Geoinformatics graduate and current BSc Honours student with academic, research and tutoring experience in GIS. I have worked with spatial data processing, remote sensing, data digitising and technical reporting. My honours research focuses on classifying rooibos and monitoring production using multi-temporal Sentinel-2 imagery and machine learning. I offer strong communication, organisation, attention to detail and the ability to explain technical work clearly.

KEY STRENGTHS

- GIS and spatial data processing:** spatial data handling, digitising, mapping and remote sensing workflows
- Python-based analysis:** scripting, model testing, data preparation and evaluation
- Machine learning exposure:** image classification, feature selection, accuracy assessment
- Training and support:** tutoring, practical assistance and technical explanation
- Reporting and communication:** technical writing, data reporting and clear presentation of results

PERSONAL STRENGTHS

Analytical thinking	Time management
Attention to detail	Teamwork
Communication	Professionalism
Problem-solving	Efficient learner
Organisation	Research orientation

CORE TECHNICAL SKILLS

- GIS and EO software**
ArcGIS Pro, eCognition Developer, PCI OrthoEngine/Catalyst, QGIS, Google Earth Engine and GitHub
- Programming**
Python, foundational SQL, JavaScript, HTML, CSS
- Remote sensing and analysis**
Earth Observation data processing, image classification, feature selection, accuracy assessment, report writing
- Productivity tools**
Excel, Word, PowerPoint, Outlook

EDUCATION

- BSc Honours in Geoinformatics**
Stellenbosch University | 2026 - Current
Research focus: classification of rooibos and monitoring of rooibos production using multi-temporal Sentinel-2 imagery and machine learning.
- Bachelor of Science in Geoinformatics**
Stellenbosch University | 2023 - 2025
- National Senior Certificate**
Bredasdorp High School | 2022

PROJECTS

- Applied remote sensing research: Rooibos monitoring**
Applied remote sensing and machine learning to distinguish rooibos from surrounding vegetation and investigate temporal satellite patterns relevant to production monitoring and decision-making.
- Hyperspectral data classification**
Processed hyperspectral data in Python, compared classification models such as SVM and Random Forest, applied feature selection techniques and interpreted model performance for data-driven analysis.
- Spatial database and web workflows**
Completed coursework involving SQL-based spatial querying and JavaScript/HTML/CSS foundations relevant to GIS workflows, structured data handling and web-based applications.

Chris Cloete

RELEVANT EXPERIENCE

Teacher Assistant GIT 214

Stellenbosch University | Feb 2026 - Present

- Tutor second-year Geoinformatics students in GIS theory and practical work.
- Explain technical concepts clearly and support users during coursework and practical sessions.

Teacher Assistant GIT 241

Stellenbosch University | Jun 2025 - Present

- Support second-year Geoinformatics students in GIS practicals and theory.
- Contribute to training and support activities aligned with clear performance outcomes.

Teacher Assistant GEO 124

Stellenbosch University | Feb 2025 - Jun 2026

- Assisted first-year Geography students with coursework, practical work and structured support.

Assistant in Digitising

Stellenbosch University | Aug 2024 - Dec 2025

- Digitised spatial data with strong attention to detail, accuracy and data quality.

Assistant Mark Checker

Western Cape Education Department | Dec 2024 and Dec 2025

- Verified examination scripts and captured marks accurately in spreadsheets, reinforcing careful data handling and attention to detail.

Civil Engineering Assistant

JC Civils | May 2025 - Jul 2025

- Assisted with road stabilisation projects, including site preparation, compaction and surveying.

LEADERSHIP & ACTIVITIES

Residence advisor, Helderberg Manskoshuis
Tutor and peer academic support
Trumpet and organ player in church

TECHNICAL TOOLS

ArcGIS Pro	eCognition	PCI OrthoEngine
Python	QGIS	Excel
GitHub	PowerPoint	Outlook
SQL	JavaScript	HTML/CSS
